The Art of Elevating Your Spaces

2026

# IKONI

A French company based in the South of France, we distribute our products throughout the national territory and collaborate with international partner agents worldwide.

Our team brings together specialists in design, engineering, and manufacturing to create outdoor furniture and pergolas tailored to the needs of both professionals and discerning private clients.

From on-site visits to 3D modeling, we work hand in hand with our clients to imagine elegant, durable, and timeless outdoor spaces. Our production relies on state-of-the-art technologies — laser cutting, robotic arms, and high-precision welding — as well as fabrics and powder coatings supplied by world-renowned brands, ensuring flawless quality and professional-grade longevity.

We place technical expertise, creativity, and attention to detail at the heart of every project. Each project deserves dedicated attention.

Each member of our team is committed to transforming ideas into reality, driven by one constant demand: to deliver a unique result, perfectly integrated into its environment.

IKONI, your passionate partner, ready to bring your most ambitious projects to life.

# FABRICS & CUSHIONS

High-end fabric – Performance & durability

# Performance & Durability

## Outdoor Cushion

This cushion features a multi-layer technical design created for intensive outdoor use. The outer fabric cover is water-repellent and easy to clean, allowing for quick maintenance and excellent stain resistance.

Inside, a waterproof interliner protects the filling from moisture and prevents water infiltration, while maintaining good breathability.

The foam filling is specially selected to offer optimal comfort, lasting support, and excellent durability.

The underside is equipped with a non-slip fabric, ensuring perfect stability of the cushion on its support. A mesh ventilation system allows for effective air circulation, promoting quick drying after exposure to water and limiting the risk of mold.

This construction ensures a perfect combination of comfort, water resistance, breathability, and durability, ideal for high-end hotel and outdoor environments with heavy use.

## High-end Fabrics

Outdoor fabrics are made from synthetic fibers such as acrylic, olefin, polypropylene, and polyacrylic.

The fibers are dyed in the mass from the outset, colored throughout for resistance to fading and long-term durability. These fabrics ensure comfort, performance, resistance, durability, elegance, and easy maintenance.

# TABLES MATERIALS

Polywood / Synteak, Teak, Ceramic,  
Powder-Coated Aluminum

# The excellence of materials, without compromise

## Epoxy Powder-Coated Aluminum

Our high-end aluminum structures are protected by a latest-generation AkzoNobel powder coating, offering exceptional resistance to UV rays, corrosion, and extreme outdoor conditions. A durable, elegant finish designed to last, season after season.

- Extremely lightweight for easy handling and installation
- Non-magnetic, immune to interference
- Stainless steel, naturally protected against corrosion
- 100% recyclable, environmentally friendly
- Easy to maintain on a daily basis
- Ultra-resistant to weather, UV rays, and marine environments

Thanks to its low density and robust structure, aluminum guarantees the strength, quality, and durability of our furniture, even in the most demanding outdoor conditions.

## Polywood Syntek - The Beauty of Wood, with Superior Performance !

Weather, UV, and moisture resistant, Polywood Syntek offers the warm aesthetic of teak without the demanding maintenance.

Durable and rot-proof, resistant to UV rays, moisture, and temperature variations, it does not warp, crack, or require any treatment.

Sustainable and eco-friendly, it guarantees exceptional longevity for high-end outdoor furniture.

# HANDWOVEN ROPE

Hand-woven, Wide selection, and Customizable

# High-Performance Ropes & Straps

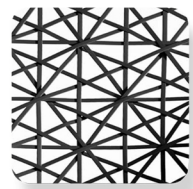

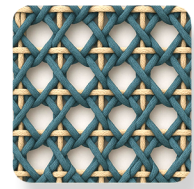

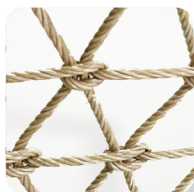

## Woven Lines – A Design Signature

Our rope and webbing embody the essence of prestigious outdoor furniture. Made from high-performance polyolefin and polyester technical fibers, they offer exceptional resistance to UV rays, moisture, chlorine, and extreme weather conditions, while maintaining unparalleled flexibility and comfort.

Each weave is crafted with the utmost attention to detail, lending finesse, texture, and character to each creation. This expertise guarantees perfect durability, remarkable structural stability, and a touch of rare elegance.

100% non-toxic, mold and bacteria resistant, easy to maintain, and fully recyclable, our ropes combine aesthetics, comfort, and performance to enhance the terraces, rooftops, and living spaces of the most demanding hotels and restaurants.

The material becomes a signature. Comfort becomes an experience.

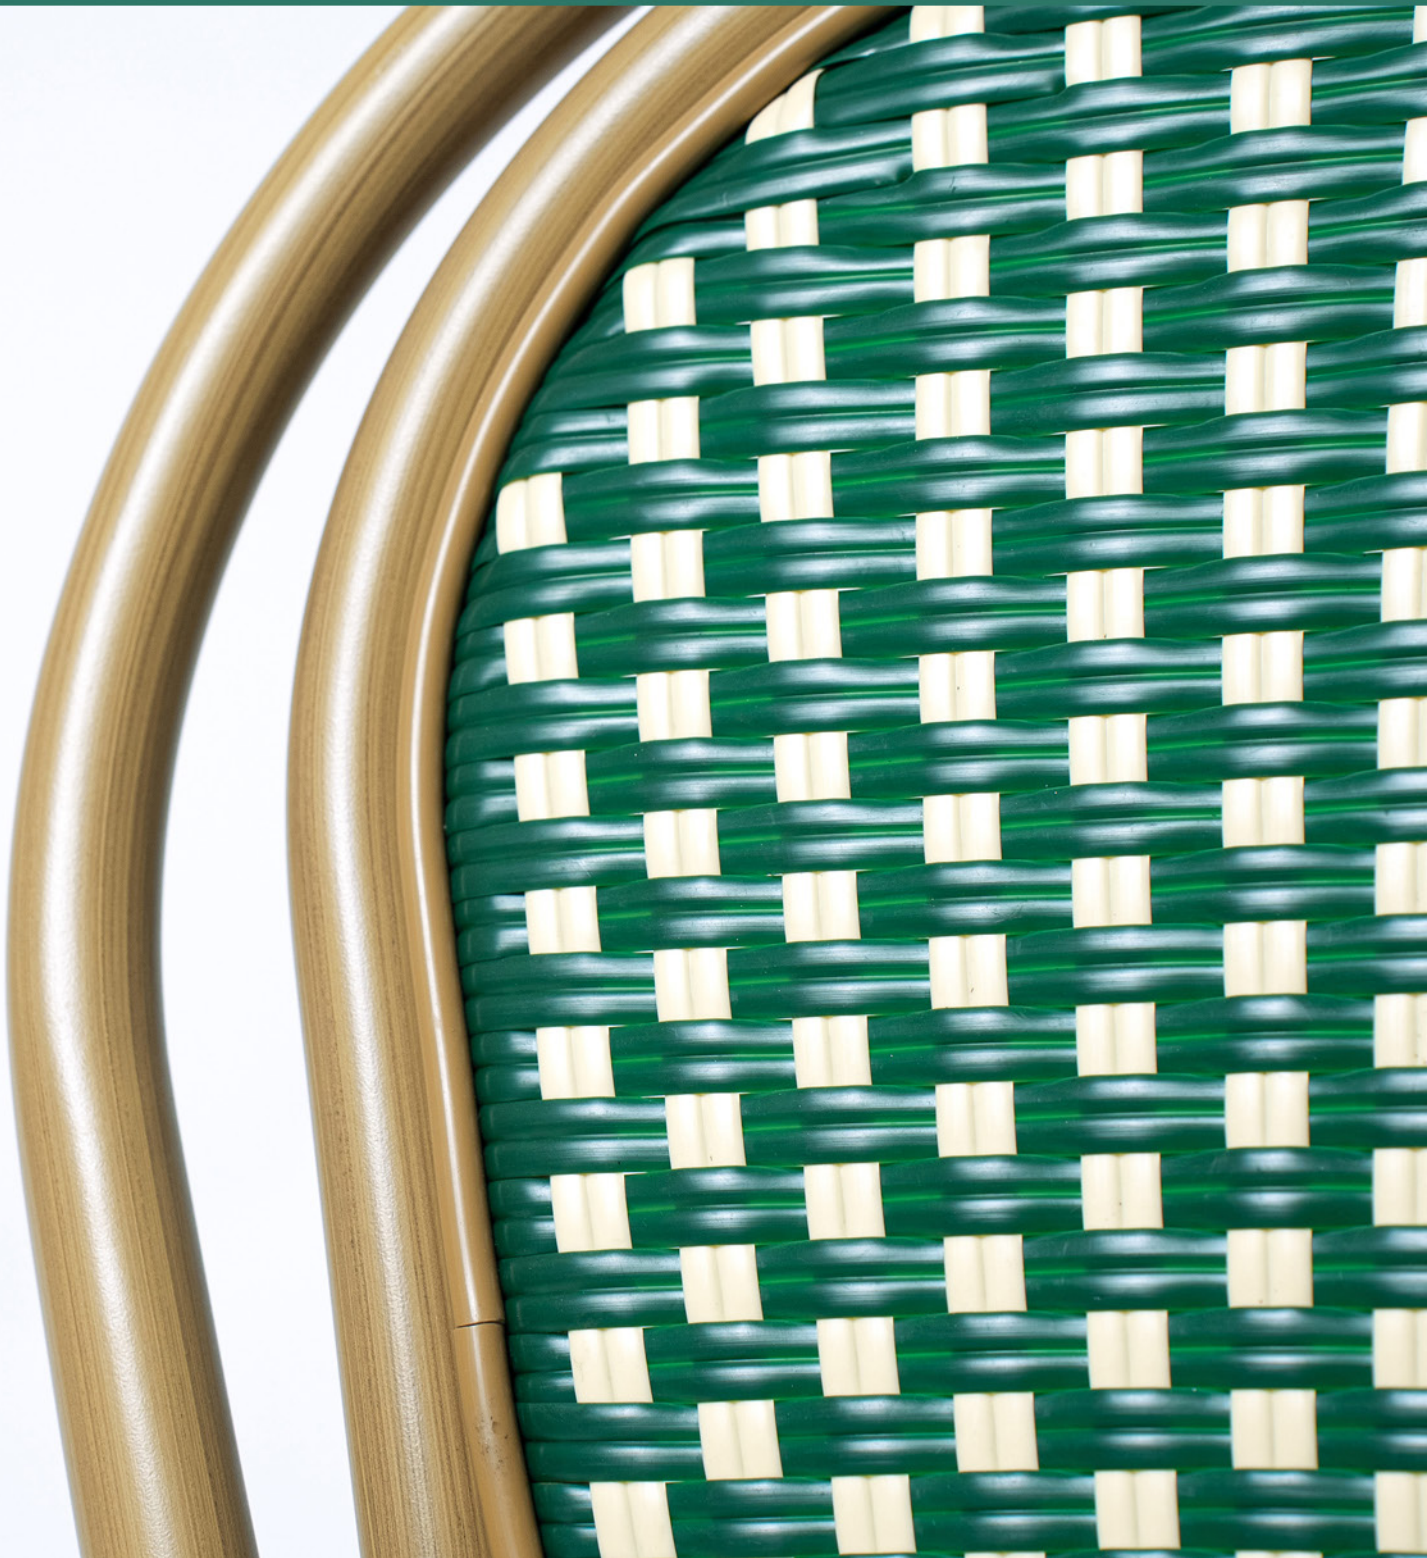

Custom  
made

# WOVEN RESIN

Hand-woven, Wide selection, and Customizable

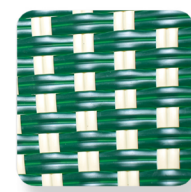

# Woven Resin: Performance and Durability

## Where Aesthetics Serve Performance

Woven resin embodies the perfect combination of aesthetics, performance, and durability for outdoor hotel and restaurant furnishings. Made from high-density polyethylene synthetic fiber, it stands out for its exceptional resistance to weather, UV rays, humidity, and temperature variations, ensuring a flawless appearance season after season.

Designed for intensive professional use, woven resin is lightweight, flexible, and robust, offering optimal comfort while maintaining its structure and shine over time. Its easy maintenance—simply clean with clear water—makes it a material perfectly suited to the operational requirements of high-end establishments.

Each piece is hand-woven, allowing for high precision in the finish and total freedom of customization: a wide range of colors, pattern variations, exclusive textures... so many options to create a unique visual signature and reinforce the identity of your establishment.

# POWDER COATING

Premium anti-corrosion powder coating

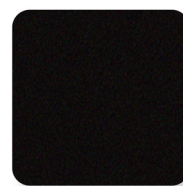

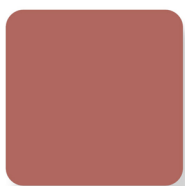

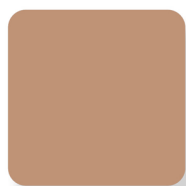

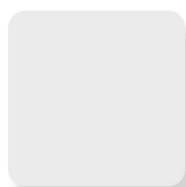

# Durable and Resistant Powder-Coated Finish

## POWDER COATING – HIGH-PERFORMANCE FINISH

Powder coating is a cutting-edge finishing process that guarantees exceptional protection and maximum durability for outdoor furniture. Thanks to a multi-step treatment—thorough cleaning, anti-corrosion passivation, electrostatic powder application, and high-temperature baking—the surface becomes perfectly smooth, uniform, and extremely resistant.

This coating offers optimal protection against impacts, scratches, UV rays, and corrosion, particularly in humid or salty environments. It also enhances the aesthetics of furniture thanks to a wide range of colors and high-end textures.

Environmentally friendly and durable, powder coating generates low pollutant emissions and guarantees easy daily maintenance. It is the benchmark finish for outdoor furniture designed to meet the demands of hotels and restaurants.

# CUSTOMIZED CONCEPT

Enhance every idea, without limits.

# The Art of Custom-Made

## Customizable colors and weaving

Each piece of IKONI outdoor furniture is designed as a unique item, created to enhance even the most demanding outdoor spaces. We manufacture custom-made furniture, combining design, premium quality, and high-end finishes to precisely meet the expectations of the hotel and restaurant industries and exceptional projects.

We create aesthetic signatures for each establishment. Each creation is the result of attentive listening, in-depth study, and tailor-made development, offering elegant, refined solutions adapted to each location.

Craftsmanship combined with industrial expertise, guaranteeing perfect attention to detail, proportions, and comfort. We rigorously select sustainable materials of the highest quality that are weather-resistant and environmentally friendly. A truly eco-responsible approach, favoring the use of recyclable materials.

Designed for intensive use, our furniture guarantees durability, optimal comfort, and easy maintenance, without compromising on aesthetics.

For sophisticated, elegant, and affordable furniture, where each piece embodies the perfect balance between prestige and optimized pricing without ever sacrificing excellence. Discreet, contemporary, and understated luxury that enhances your identity.

The Craft. The Material. The Excellence...

The experience begins here.
